

Turn your iPad into a point of sale (POS) register

Shopkeep facilitates payments via the iPad.

Ensure you are getting all the features you need for your business from your iPad POS. ShopKeep has all the functionality of a computerized point-of-sale system on an iPad, for less than the price of a cash register and without the hassle of maintaining servers and backups. ShopKeep's preferred payment processor, Mercury Payment Systems®, offers competitively priced, secure transactions with no transaction limits on funding and prompt daily deposits.

How ShopKeep with Mercury® processing works:

ShopKeep's iPad application turns any iPad into a POS register. A cash drawer, receipt printer, and iPad stand is all a business needs to start taking payments. A retailer can ring transactions, swipe credit cards, pop the cash drawer, and print receipts all from their iPad.

ShopKeep offers the best overall card data security solution with a Mercury Payment Systems-specific Magtek iDynamo card reader. The card reader docks to the iPad charging port (instead of headphone jack) for end-to-end (E2E) secure encrypted credit card processing. The E2E encrypted iPad credit card reader keeps card data safe from theft by encrypting it at the moment a card is swiped or keyed.

ShopKeep is perfect for specialty retail shops and quick serve operations including coffee shops, bakeries, cafeterias, concession stands, pop-up stores, kiosks, and other similar shops.

Unique features of ShopKeep:

- **Flexible, 30-day subscription** includes automatic updates and 24/7 support for only \$49 per month (per register).
- **Web-based** anytime, anywhere real-time reports and business information for multiple iPad registers in different locations.
- **Secure, integrated payment processing** from preferred provider Mercury Payment Systems.
- **Unlimited support 7 days a week.**
- **Built-in tip functionality.**
- **Saves valuable counter space** and presents a tech-savvy business image.
- **Prints receipts** and pops the cash drawer like a standard register.

Smart Payment Processing™

Why Mercury® for integrated payment processing?

- Competitive rates, no long-term contracts
- No transaction limits
- Full funding is promptly and seamlessly deposited into your account
- Online customer portal and transaction reports
- 24/7 live, U.S.-based support
- End-to-end (E2E) secure processing
- iDynamo card reader docks to iPad through charging port

iDynamo card reader is only \$99 (or \$12/month rental) with free ground shipping.

“ I find ShopKeep to be an invaluable tool to run my multi-store coffee business. It's durable, dependable and fast. The real time reporting lets me stay on top of sales and the back office tool lets me make changes on the fly and monitor the business from anywhere. Because of its small footprint on the counter, the iPad app is particularly good POS software for my coffee kiosks. The tip function tripled my baristas' tips. I had been looking for an appropriate POS system for the last five years and it wasn't until I discovered ShopKeep that I was able to make the successful plunge. — Jonathan Rubinstein, Joe The Art of Coffee, New York, NY ”
