TEEPOS

RETAIL

- Reflection POS® is the most comprehensive and reliable retail management system available in its class. Reflection POS® adapts to the way you do business, making it easy for managers and employees to learn and use.
- Operating System. Reflection POS® enables retailers to deliver fast turnaround times and accurate transactions, creating a delightful shopping experience for customers
- IMPROVE ORDER ACCURACY

TABLE SERVICE RESTAURANTS

- Reflection POS is the most comprehensive and reliable table-service restaurant management system on the market.
- Reflection POS adapts to the way you do business, making it easier for managers and employees to learn and operate. The restaurant floor plan gives you and your staff a graphical view of the status of every table within your establishment. Reflection POS enables restaurant owners to provide fast and accurate service, making the dining experience enjoyable for your customers.

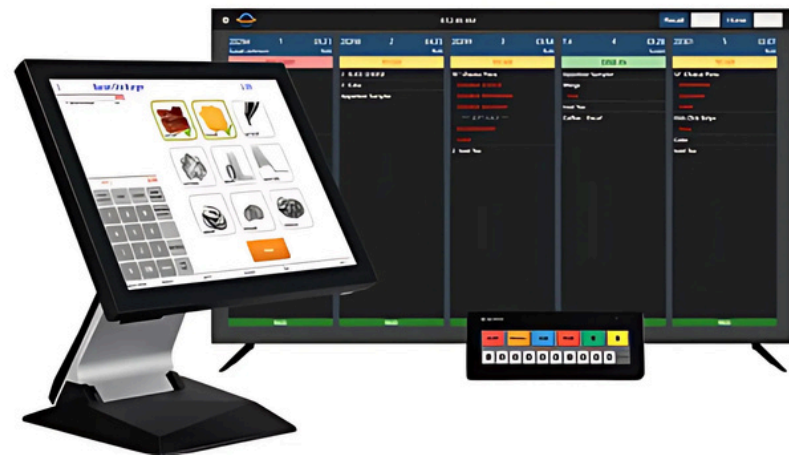

GRAPHICAL REAR DISPLAY

- The Reflection POS® Rear Graphic Display is a vital component for counter-service restaurants. Built on the foundation of Microsoft® Windows® Extended Desktop, the GRD is an affordable marketing option for any merchant.
- Customers see real-time transaction details in an easy-to-read format, so errors can be instantly detected and corrected. Scrolling ads and videos promote high-margin products at the point of decision, increasing sales and profitability. Content can be managed on a single POS terminal or from a back office PC inside the store.

TEEPOS

KITCHEN DISPLAY SYSTEMS (KDS)

- The Reflection POS Kitchen Display System (KDS) is a tool that easily connects your front of house and your kitchen.
- Streamline your workflow by digitally sending orders to the kitchen for immediate review and fulfillment.
- Eliminate the need to rely on paper tickets that can easily be lost or become illegible. Your KDS will become the restaurant's operations center, digitally moving orders from the point of sale (POS) system to your kitchen's visible display screen. Your KDS will automatically display orders with modifications and feature a timer so kitchen staff can track the order and the time spent on it.

BACKOFFICE SOFTWARE

- PC Workstation is a software application designed for Microsoft Windows® that brings point-of-sale system management functions into the familiar environment of a back office computer. The software seamlessly integrates into the point-of-sale network and communicates directly and continuously with POS terminals to provide real-time reporting. PC Workstation has been designed to function similarly to Reflection POS to minimize setup and training time.
- **REAL-TIME REPORTING**
- **POS PROGRAMMING**
- **JOB EDITING**
- **CHECK VIEWER**
