The PAX A35 is a point-of-sale (POS) terminal that offers a comprehensive solution for payment processing.

Key Features:

- **Intuitive Interface:** Easy to use with a touch screen.
- **Connectivity:** Compatible with Wi-Fi, Bluetooth, and 4G.
- **Security:** Compliant with PCI, EMV, and contactless payment standards.
- **Applications:** Ideal for retail, hospitality, transportation, and more.
- **Software:** Includes applications for payment processing, inventory management, and CRM.
- **Remote Management:** Allows device management and software distribution via the MAXSTORE platform.
- **Support and Services:** PAX offers technical support and additional services to ensure a seamless experience.

The ideal payment solution for multilane retailers

- **Designed for retail, fashion, and multi-line businesses that require a quick, reliable, and compact tool. The PAX A35 is the first point-of-sale terminal with Android technology, akin to a chameleon, capable of adapting to any checkout environment while offering the best of Android technology.**

- Casing options: Metallic Grey or Black & White

Next level checkout:
Equipped with a larger vivid display, the A35 supports multimedia content, and is ideal for running effective promotional campaigns, allowing you to manage coupons with QR codes thanks to the front camera.

Certified to the highest payment standards
PAX A35 Android Retail PINPad is certified to the latest PCI PTS version 6 standards, which enables the device to be used for longer and maximises customer returns on investment (ROI). It has also achieved the MasterCard Enhanced Contactless certification.

Accepting any payments
The WiFi and Bluetooth connectivity options ensure that you're always ready to take any payment type, helping you to remain up to date with payment method consistency in today's omni-channel retailing world.

The best of Android technology
As the A35 runs the latest Android 10 operating system, it supports multiple applications and Value Added Services (VAS) management on a single device.
